

Learning through play is an important part of a child's development.

Amazing benefits of Jim & Jolly Tricycle

We have two types of tricycles in Jim & Jolly category. One is rechargeable and the others is Paddle oriented. Riding on our tricycles help your kids develop their coordination and balance when they are mastering their steering skills. It helps to develop their hand-eye coordination when they are taking turns, avoiding obstacles and by ringing bells.

Rock &roll with our Rocker series

Rocking a child helps to establish a healthy heart rate as well as good blood circulation. Rocking movements actually help to stimulate the vestibular (inner ear) system, which is another crucial part of our body to create our balance. In the beginning, we would recommend parents to help their babies and toddlers to learn how to use the rocking Deer, Tommy and motor bike rocker to Guide them through the movement required to make the rocker move. Help them practice while their body starts to remember how their body is balancing itself until they are able to fully handle the toy on their own.

No compromises with baby's first step

Having a giggling and excited baby running around the room with in a baby walker is a pleasant sight for parents. Ours Baby walkers are designed to help babies learn how to walk, and they provide additional stability, which will have them scooting around the house in no time. These devices usually feature a hard-plastic base on wheels and a suspended seat with holes for the toddler to put their legs through. Of course, today's walkers are not what they were decades ago. There are true benefits for using a baby walker for the children eager to learn how to walk.

Benefits of playing outdoor for physical development

The benefits of playing outdoor for children's development are extensive, both in early childhood and the school-age years. Playing outside directly impacts a child's weight, physical strength and ability to fight off illness. Kids who spend a lot of active time outdoors in their early years generally continue to exercise more regularly as they age. Encouraging outdoor play in young children helps them develop a healthy attitude about maintaining an energetic adult lifestyle.
